A company has a custom web-based API that is hosted on Azure. You design a Microsoft Power Platform solution to provide the company additional capabilities. You need to integrate the Microsoft Power Platform solution with the API. What should you recommend?

- A. Connection reference
- B. Custom connector
- C. Desktop flow
- D. Data gateway

A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.
The customer wants to keep the service process simple and save on both licensing and development time.
You need to recommend solutions for the customer.

What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Solutions	Answer Area	
	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook.	Solution
Model-driven app	Use Universal Resource Scheduling.	Solution
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Solution

You are designing a Power Platform solution.

The company wants its development team to create an interactive slider visualization to indicate and filter timeframe data that can be used across all of its apps that can be styled and manipulated by using code.

You need to recommend a technology that meets these requirements.

Which technology would you recommend the developers adopt to assist the implementation team?

- A. Web resource
- B. Power Apps Component Framework control
- C. JavaScript
- D. Canvas app

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:

- ☞ Track opportunities and reasons for the win or loss of opportunities in the context of other related data.
- ☞ Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Power Platform tool to help the client visualize the data.

Which two technologies should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI
- B. Power Automate
- C. Power Virtual Agents
- D. Power Apps

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

- ⇒ Users must have a visual guide to know which data to enter in each step of the opportunity management process.
- ⇒ The system must automatically assign the opportunity to a manager for approval once all data is entered.
- ⇒ The system must notify an assignee each time an opportunity is assigned to them by using push notifications.
- ⇒ When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Business process flows
- B. Power Apps mobile apps
- C. Power Virtual Agents chatbots
- D. Power Automate desktop flows
- E. Power Automate cloud flows

A company has an on-premises data warehouse and analytics solution. The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.

The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.

The new solution must meet these requirements:

- ⇒ Support the current data warehouse.
- ⇒ The solution must support drill-through capabilities into the data.
- ⇒ Retain at least seven years of historical data.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Data storage and normalization.

Solution

<input type="checkbox"/>	Data Gateway
<input type="checkbox"/>	Azure Data Lake
<input type="checkbox"/>	Dataverse for Teams
<input type="checkbox"/>	Azure Analysis Services

Visibility to key operational metrics from various Teams channels.

<input type="checkbox"/>	Power BI
<input type="checkbox"/>	AI Builder
<input type="checkbox"/>	Teams adaptive cards
<input type="checkbox"/>	Microsoft Teams integration object

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Allow users to change the status of a record only if a custom column named Reason is populated.

Component

Business rule
Power Automate flow
Asynchronous plug-in
Background workflow

Prompt users to update each opportunity product record when an opportunity is won or lost.

JavaScript code
Real-time workflow
Power Automate flow
Asynchronous plug-in

A legal services organization uses Microsoft SharePoint for case management and documentation. The organization plans to migrate its case data and manual processes to the Microsoft Power Platform and Microsoft Dataverse. Case data is confidential and is disclosed only to the employees assigned to a case.

The organization has the following requirements:

- Lawyers must manage their assigned legal cases and case documentation in one app.
- Paralegals must be able see a lawyer's case details only when invited by the case lawyer.
- Paralegals retain access to the case documentation by using the existing SharePoint permissions.

You need to identify which components will satisfy the requirements without any custom development.

Which components should you use?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Lawyer app	Canvas app Model-driven app Microsoft Teams channel app for lawyers only Microsoft Teams channel app shared with lawyers and paralegals
Paralegal app	Canvas app Custom page SharePoint app Microsoft Teams channel app

You design a Microsoft Power Platform solution for a company.

The company has an existing Azure SQL database with customer information that it wants to continue using. The company wants to share access to data that is held in Azure SQL with the following people:

- internal company employees, using built-in process functionality
- external customers to view their data

You need to recommend the appropriate components to use for the application.

Which two components should you recommend?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Pages
- B. Custom pages
- C. Canvas app
- D. Model-driven app

You are assessing the capabilities of a project for a customer in the education sector.

The solution must meet the following requirements:

- Include curriculum and student management capabilities.
- Conform to on-going Microsoft platform upgrades.
- Minimize custom coding and configuration.

You need to recommend a solution.

What should you recommend?

- Microsoft Power Platform admin center
- Microsoft 365 admin center
- Power Pages
- AppSource

You are reviewing a list of business requirements submitted by a plumbing company.

The company has the following requirements:

- ⇒ Send articles to technicians to allow customers to resolve issues.
- ⇒ Track work progress and inspections at customer sites.
- ⇒ Schedule technicians for service appointments.

You need to recommend solutions to meet the customer's requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct business requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Solutions	Answer Area	
	Business requirement	Solution
Dynamics 365 Field Service	Send articles to technicians to allow technicians to help customers resolve issues.	Solution
Dynamics 365 Customer Voice	Track work progress and inspections at customer sites.	Solution
Dynamics 365 Customer Insights	Schedule technicians for service appointments.	Solution

You are creating a scope of work document for a solution.

You have the following requirements:

- ⇒ Track support cases, first response time, and resolution time.
- ⇒ Include a chat-like interface that allows managers to check the status of cases with minimal manual searching.
- ⇒ Allow cases to have multiple different priority levels.

You need to include the required Dynamics 365 and Microsoft Power Platform components.

Which two components should you include? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Customer Service
- B. Power Virtual Agents
- C. Power BI
- D. Dynamics 365 Customer Voice

Power Platform Solution Architecture

A Hands-on Approach

FASES DEL PROYECTO

GESTION DEL CICLO DE VIDA DE LAS APPS

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

- ⇒ Save captured images in an appropriate location.
- ⇒ Analyze saved images by using an image recognition process.
- ⇒ Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Save captured images in an appropriate location.

Technology option

Business process flow
Desktop flow
Instant cloud flow
Automated cloud flow

Analyze saved images by using an image recognition process.

Instant cloud flow and AI Builder
Automated cloud flow and AI Builder
Desktop flow and AI Builder

You are designing a Power Platform solution.

The company wants its development team to adopt the construction of repeatable components for its implementation team to reuse on different entities and forms.

You need to recommend a technology that meets these requirements.

Which technology would you recommend the developers adopt to assist the implementation team?

- A. JavaScript
- B. Power Apps Component Framework control
- C. Web resource
- D. Canvas app

A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.

The company has the following requirements:

- Provide customers with an online portal where they can submit and review cases.
- Ensure that customers can chat online with a customer service representative at any time.
- Route chats to customer service representatives based on skill and availability.

You need to recommend a solution to the company.

Which three components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Virtual Agents chatbots
- B. Customer self-service portal
- C. Dynamics 365 Field Service
- D. Business process flows
- E. Omnichannel for Customer Service

LABORATORIO 1

You need to design a Power Platform solution that meets the following requirements:

Capture data from a row during deletion to be used in an automated process.

Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Yes

No

Capture data from a row during deletion to be used in an automated process.

Use AI to process forms and automate data entry from paper-based forms.

A pharma company uses a proprietary system to manage its chemical experiments. The company uses Microsoft Dynamics 365 Project Operations to manage lab staff and resources.

Employees manually update Project Operations data with data from their proprietary system as needed. Employees are not able to provide a definite schema for their data.

You need to provide a solution that will allow employees to configure their own automatic updates.

Which component should you use?

- A. Dataflows
- B. Custom connectors
- C. Data gateways
- D. Microsoft Power Automate flows

You are designing a Microsoft Power Platform solution.

The solution requires Microsoft Power Platform components and custom coding.

You need to describe the benefits of using Microsoft AppSource.

Which are three benefits of AppSource? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. App uptime of at least 99.9 percent
- B. Azure Active Directory federated single sign-on (AAD federated SSO)
- C. Microsoft standardized license agreement and privacy policy
- D. Reduced coding efforts because anyone can publish in AppSource
- E. Free trial before committing to any additional costs

You are a Microsoft Power Platform architect.

You have identified several project risks.

You need to categorize potential risks that are specific to your customer.

How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories

- Resource risk
- Business risk
- External risk
- Security risk

Answer Area

Risk

The project requires integration to custom-built on-premises systems that store business-sensitive data.

The organization is currently making significant go-to-market strategy adjustments.

The customer has a limited budget in relation to the project requirements.

High-Level Business Process and Data Modelling Workshops

1

Discovery preparation

- Define the desired outcome
- Define the agendas for each workshop
- Identify attendees for each workshop
- Schedule the workshops

2

Deliver discovery session

- Start with the desired outcome
- Drive the agenda
- Ask guiding discovery questions

3

Discovery wrap-up

- Distribute workshop minutes and actions
- Review and consolidate notes shortly after

Modelado de Proceso

SESIONES DE CAPTURA DE REQUISITOS

Preguntas abiertas

- ¿Cómo crees tú que sería adecuado implementar esta función?
- ¿Qué te gusta más y qué menos sobre cómo ha quedado el wireframe de este informe?
- ¿Me explicarías, por favor, en qué consiste tu trabajo diario?

Preguntas cerradas

- ¿Crees que la función podría comenzar con una búsqueda y terminar con una lista de resultados exportables en formato PDF?
- ¿Este wireframe está como habíamos hablado?
- Entonces ¿tu trabajo diario consiste en revisar las tareas pendientes, determinar prioridades y asignar personas que las realicen?

1

Workshop preparation

- Define the desired outcome
- Review previously defined requirements
- Define the agendas for each workshop
- Identify attendees for each workshop
- Schedule the workshops

2

Workshop delivery

- Start with the desired outcome
- Drive the agenda
- Ask guiding questions
- Identify functional and non-functional requirements
- Assess feasibility
- Manage exceptions

3

Post workshop

- Distribute workshop minutes and actions
- Formalize the sign-off (if required)
- Review and consolidate the notes

SWOT ANALYSIS

REQUISITOS FUNCIONALES

- Los siguientes escenarios describen ejemplos simples de requisitos funcionales:
 - Como usuario de ventas, necesito poder cerrar una oportunidad como perdida y luego capturar por qué se perdió para que podamos mejorar nuestras tácticas de ventas en el futuro.
 - Como gerente de ventas, necesito poder aprobar un descuento en una cotización para poder reducir el precio total y otorgar un descuento al cliente.
 - Como contador del personal, quiero evitar cerrar un lote que tiene artículos pendientes para no tener que volver a abrirlo más tarde.

Example requirements gathering exception management

You need to recommend methods for assigning security to each group of users.

The customer provides the following requirements:

- ⇒ Customers need the ability to submit a case through an online portal.
- ⇒ Portal must handle 75 concurrent users submitting cases.

Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	<input type="text"/>
Non-functional	Portal must handle 75 current users submitting cases.	<input type="text"/>
	Service data must be retained for at least six years.	<input type="text"/>

You are performing a requirements analysis for a customer.

The customer provides the following requirements:

- ⇒ Power Platform storage capacity must remain under 100 percent.
- ⇒ Customer service representatives must be sent an email when they are assigned a case.
- ⇒ Help desk technicians must be shown an error message when they try to delete a task row.
- ⇒ The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	<input type="text"/>
Functional	Customer Service representatives must be sent an email when they are assigned a case.	<input type="text"/>
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	<input type="text"/>
	The plug-in pass rate must remain over 99 percent for the production environment.	<input type="text"/>

You are a Microsoft Power Platform architect reviewing requirements for an offline shopping app.

You need to identify requirement types for the app.

How should you categorize the requirements? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories

Functional

Non-functional

Answer Area

Requirement

The app must automatically send a confirmation email to a customer when they place an order.

Credit card numbers must be encrypted.

Category

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain project.

The project has the following requirements:

- Retail employees must use the application on a company-provided tablet device.
- The app must store data offline.
- Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.
- Apps are shared with security group teams for users to access.

You need to identify the project's functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories	Answer Area	Requirement	Category
Functional		Retail employees must use the application on a company-provided tablet device.	
Non-functional		The app must store data offline.	
	⋮	Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.	
		Apps are shared with security group teams for users to access.	

You are a Microsoft Power Platform architect gathering solution requirements for a customer. Management uses three different systems to locate asset inventory and contract details.

Management must view inventory with the ability to select assets and view additional details. Sales representatives have issues locating assets based on specific features in a timely manner when working with customers.

You need to prioritize the requirements.

Which priority should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Enable sales representatives to locate assets in less time
